DUO/PRIM System

Product information

The DUO PRIM horizontal anchor lifeline system is a multi-user anchorage device, D - type. The system may be installed either to a vertical structure (e.g., walls) or on roofs / terraces.

The system consists of the following category of parts:

- End, structural anchorages, such as anchor plates or poles.
- Intermediate structural anchorages and turn sets.
- Energy absorber.
- Rope tensioner.
- Connecting elements.
- Cable line.

An oval type connector is used as a movable anchor point for a personal protective equipment.

The recommended connector, verified for the PRIM system is the PROTEKT-AZ01 oval type connector. The AZ011 connector allows the user easy passing through the intermediate rope holders without detaching from the cable.

The PRIM system parts are made of the following materials: hot deep galvanized steel, stainless steel and polyamide.
