Adjustable Aluminum Monobeam Spreaders PALR ALU

Product information

The PALR ALU adjustable aluminum monobeam spreader is designed for industrial lifting operations requiring flexible hook positioning and reduced beam weight. Adjustable hook spacing with removable pins supports different load dimensions while articulated rotating hooks improve load alignment during lifting with slings or cables.

Best used for:

- Lifting applications requiring adjustable hook spacing in 100 mm increments.
- Handling loads with synthetic slings, chain slings or wire rope assemblies.

Product benefits

- Adjustable hook positions simplify handling of varying load widths.
- Rotating articulated hooks improve sling alignment during lifting.
- Forged safety latches support secure load attachment.
- Tear-resistant eyelets suit synthetic slings and cable use.
- No structural welds and FEM 5 classification support demanding industrial use.
- Delivered with user's and maintenance manual and EC certificate of compliance
